GLOSSARY

BRUSHES

- **SRT** *Solid Round Tapered*
- **PBT** *Polybutylene terephthalate is a thermoplastic engineering polymer. PBT is resistant to solvents, which makes it perfect for oil and solvent based paints*
- **PET** *Polyethylene terephthalate is a thermoplastic polymer resin of the polyester family and is used to give more stiffness to the brush*
- **FILAMENTS** *Many filaments in our paint brush family are composed of a mixture of PBT and PET to give the needed flex and durability with all paints*

ROLLERS

- **LINT FREE** *Does not leave fibres on the painting surface*
- **NAP** *Thickness of material on roller refill*

**POLYESTER**

CN.PAT: 2019304563343

- **Roller Refill Polyester for all paints**
- For use with standard **6mm** diameter roller frames.
- Lint free
- Rounded end works great for rolling into corners.

A collection of various surface preparation tools is displayed on a light gray background. The tools include several hand scrapers with different handle shapes and blade sizes, some with black handles and others with light blue or silver. There are also larger, rectangular metal scrapers, a long-handled roller with a black handle and a silver frame, and a smaller roller with a light blue handle. A utility knife with a black handle and a silver blade is visible in the upper left. The tools are arranged in a scattered, overlapping manner, showcasing a variety of equipment used for surface preparation.
